

Spring 86G56 looking Great

Just been checking out some spring sorghum crops recently and Pioneer's new 86G56 sorghum is looking excellent. The outstanding staygreen the hybrid has really showed up in a couple of crops.

The Bonus was starting to fire off before the rain while the G56 is still showing excellent levels of staygreen.
86G56 is showing good yield potential under irrigation. The crop below is at Matthew Pennas "Connors Junction"
